

10-STEP LAYOFF SURVIVAL GUIDE

A photograph of a middle-aged couple sitting together. The woman is on the left, wearing a white cardigan, and the man is on the right, wearing a grey sweater and glasses. They are both looking towards the right with serious expressions. The background is a blurred indoor setting.

Have you been laid off close to retirement?

These 10 steps can help you decide your next move.

GOING THROUGH A LAYOFF CAN BE A STRESSFUL AND EMOTIONAL TIME. ADD THE STRESS OF A GLOBAL PANDEMIC, AND IT CAN FEEL DOWNRIGHT OVERWHELMING.

If you've been laid off, you're not alone. As the COVID-19 pandemic illustrated, just about any employee can be let go at any time. Shelter-at-home orders during those early months created panic for businesses across the country, forcing many to shut their doors and lay off workers. In fact, for the week ending March 28, 2020, a record-breaking 6.6 million Americans applied for unemployment benefits caused by the virtual shutdown of our nation.¹ The previous record: just under 700,000 claims filed in a single week in October 1982.²

The country has since reopened and in many ways rebounded from those job market woes, but some troubling trends have lingered. For instance, while the unemployment rate fell to a pandemic era low of 4.8% in September 2021, that same month saw the U.S. add a meager 194,000 jobs, falling far short of the expected 500,000.³

While the uncertainty of a layoff can feel like you've suddenly been saddled with an enormous burden, you can take measures that could help reduce stress and get you back on course. And, if you're close enough to retirement, you might even be able to say goodbye to the working world and enjoy an early retirement!

So, before you let the stresses of your situation get you down, consider the 10 steps in this guide to help you survive a layoff. They can help you determine if you need to find another job, or if you can take this scary situation and turn it into a blessing in disguise.

KEEP CALM AND TAKE IT ONE STEP AT A TIME

Whatever you do, don't freak out. A layoff can be scary, but you have options. Leave your current job with grace and respect your employer. Realize that your former boss is also having a hard time with this decision. Anything you can do to make sure you're leaving on good terms is always a sound idea, especially if your former business is able to recover from the economic conditions that led to your layoff (and, of course, you wish to be rehired).

DETERMINE YOUR LIVING EXPENSES

When a layoff strikes, you need to know the facts. Before you start believing that the world as you know it has ended, simply figure out how much income you need to survive for a while. Very few people really know how much they spend each month. Once you identify the income you need to survive, you can establish a useful baseline. Begin by gathering all of your financial information. This baseline will help you determine if you need to land another job, or if you even need to bother.

CREATE AN INVENTORY OF YOUR RESOURCES

Next, create an inventory of the assets you have available to help you meet your "baseline" expenses. Make sure to include savings, checking, 401(k), all other investment accounts and any additional assets such as real estate or royalties.

ADD IN SEVERANCE PAY

Severance pay is not mandatory in the U.S., and many employers do not offer such compensation. Severance pay is usually outlined in an employment contract, if you have one. Severance packages usually include compensation equal to a stipulated length of service typically measured in weeks or months. This payment could potentially provide, depending on your circumstances, six to 12 months of income to meet baseline expenses while you figure out your next move. If you receive a severance package, this can be a valuable time to make decisions about what kind of transition you want to make. Unfortunately, if your former company closes, severance payments may never arrive.

STEP
05

UNDERSTAND HOW UNEMPLOYMENT BENEFITS WORK

You may be eligible for unemployment benefits if you lose your job by no fault of your own — such as through a layoff. The amount that workers can receive from unemployment insurance programs depends on the state in which you worked. On average, unemployment benefits will replace roughly 40% to 45% of your weekly income. The maximum number of weeks you can receive payments also depends on your state, with the range varying from 12 weeks to 30 weeks.⁴

For more on how to file unemployment benefits, visit <https://www.careeronestop.org/WorkerReEmployment/Toolkit/unemployment-benefits-finder-help.aspx>.

STEP
06

LEARN ABOUT YOUR HEALTH INSURANCE OPTIONS

If you are laid off, you will likely lose your health insurance. You may be eligible for COBRA benefits. COBRA is an acronym for the Consolidated Omnibus Budget Reconciliation Act, which provides eligible employees and their dependents the option of continued health insurance coverage following the loss of a job. COBRA coverage extends for a limited period of 18 or 36 months, depending upon various circumstances. The cost of COBRA coverage is usually high because you'll be responsible for the entire cost of the insurance (employers usually pay a considerable portion of the premiums while you're employed).

We see people in the office every week who could retire were it not for the need to keep medical coverage. If your company plan isn't providing any continuing coverage, health insurance coverage can be expensive during the gap in time until you are eligible to receive Medicare at age 65.⁵

**ON AVERAGE, UNEMPLOYMENT BENEFITS
WILL REPLACE ROUGHLY 40% TO 45%
OF YOUR WEEKLY INCOME.**

GET A NEW SOCIAL SECURITY ESTIMATE

If you're in your 60s, we suggest you get an update from the Social Security Administration about your potential retirement benefits. Most people begin taking Social Security benefits at age 62. This is often the wrong decision. The difference between taking benefits at age 62 or 66 is an additional 25% more income. If you wait until age 70, you can receive 32% more than at age 66. Too many people make the decision based on one variable: How many years of income later will it take to make up for starting benefits at age 62. Instead, comprehensive planning can help you make an efficient overall decision.⁶

Once you determine different levels of income benefits based on age, another issue to consider is that you may only need to pull money from savings for a few years. If you know your baseline income needs, then finding the best solution is much simpler. Knowing the best solution tremendously lowers the stress of a layoff, considering much of the stress stems from unknown or undetermined variables.

CONSIDER A LUMP-SUM PAYMENT

Do you have a pension that you can roll over or take as a lump-sum payment? Make sure to note when you can start receiving your pension and the income it will provide. Although you may have already considered this in your baseline inventory, it's noteworthy that your pension could be taken as a lump sum now through a rollover to an IRA. Instead of waiting a few years to receive a future pension, the lump sum may provide more benefit if rolled over and accessible. Unfortunately, there's not a one-size-fits-all standard solution, and there may be tax implications to consider. Obtaining a professional opinion on this issue is highly recommended.

**THE DIFFERENCE BETWEEN TAKING
SOCIAL SECURITY BENEFITS AT AGE 62 OR 66
IS AN ADDITIONAL 25% MORE INCOME.**

STEP
09

**DETERMINE IF YOU WANT
TO GO BACK TO WORK**

Many people will fear that they must go back to work when they're really ready to retire. Others will know that they aren't ready to stop working. In either case, if your assets are enough to cover your expenses, you will be prepared for whatever avenue you choose to pursue. In our experiences, many people who are capable of retiring don't think they are prepared because they haven't created a plan.

STEP
10

**SEEK A
PROFESSIONAL OPINION**

Surviving a layoff is doable but requires some planning and perspective. Putting all of the pieces together can be quite liberating if you discover that you really don't need to return to the stress that can come from long hours on the job.
